"IES Foundation Year is a good start for life at The University of Queensland."

IES Foundation Year prepared me for the Australian education system. During the course, my English and study skills improved significantly. That was the greatest benefit for me to continue to study and achieve my goals in university.

I have an interest in genetic information and I want to be a biotechnology-engineer.

If you want to do well at university and prepare for studying in a different country, IES Foundation Year will really help you to achieve your dreams.
